

LASTING ELEGANCE

ENTRY DOORS 2024

HMI ADVANTAGE

HMI is the one-stop-shop for your entryway needs. Whether it's our Entry Doors, Aluminum Storm Doors or Security Storm Doors. Our advanced production facilities make HMI one of the few companies that manufacture doors according to customer specifications. We are a make-to-order company treating each door as a custom order, whether it is standard size or not.

Lasting Elegance Steel, Regency & Aspen Fiberglass Entry Doors

HMI's entry doors are designed to the highest standards of energy efficiency, security, and rigidity without sacrificing beauty. They are available in either *steel* or *fiberglass*. Made to enhance your entryway and satisfy the unique taste of each homeowner, we offer a variety of rich colors with a comprehensive collection of decorative glass.

We offer the most secure entry doors on the market. Our steel doors have a 19" lock block with a 14 gauge steel reinforcement channel. Whether it is smooth or textured steel, the HMI steel door, is equipped with 20 gauge galvanealed steel. Our Aspen fiberglass collection boasts a 4" lock side stile with a 7 gauge steel plate embedded the entire length of the door.

To deter rotting, the top and bottom rails inside of our entry doors are composite and for optimal insulation our doors are injected with high density polyurethane foam filling every nook and cranny.

The vinyl thermal break on our steel doors also improves energy efficiency by controlling heat transfer. Thermally broken metal doors are insulated against heat and cold conduction. This is done by separating the outside metal from the inside with a non-conductive material (vinyl).

We set the industry standard for custom, top of the line entry doors. With over 80 door styles, 36 paint colors, 15 different glass families, 10 stain finishes, 5 custom arch top profiles, and the ability to fabricate doors in 1/4" increments to fit in either a new construction or replacement frame opening, there is no need to look elsewhere for your entrance way needs.

Whether you choose a steel or fiberglass door, HMI exceeds your expectations of security, energy, efficiency and beauty.

PROUDLY MADE IN THE U.S.A.

LASTING ELEGANCE STEEL DOORS

- All HMI steel doors are 20 gauge enhancing their security.
- Available in smooth and textured steel.
- The rolled steel door edges with a vinyl thermal break, the full length of the perimeter, prevents heat transfer.
- Composite rail at the top and bottom deter rotting.
- Injected polyurethane foam insulation fills every nook and cranny inside the door giving it optimal insulation.
- The 19" wood lock block with 14 gauge steel reinforcement U-Channel wards off break-ins at the lock location.

STEEL REPLACEMENT FRAME

Steel Replacement Frames are constructed of 18 gauge galvanized steel with 10 gauge plates located on the lock and hinge sides for extra reinforcement to help keep intruders out. White is standard.

Steel replacement frames are utilized when removal of the existing jamb is not practical. It allows for a new door to be adapted into an existing jamb, providing new hinge & strike plates while hiding the old hinge and strike cut-outs.

PRIMED WOOD JAMB - Standard

4 ⁹/₁₆ Prime Wood Jamb STD

Optional: 5 ¹/₄, 6 ⁹/₁₆ and custom sizes up to 12"

Painted or stained aluminum cladding to match interior and exterior of the door.

ALUMINUM CLADDING - Optional

.028 Thick aluminum cladding prolongs the life of your HMI door unit.

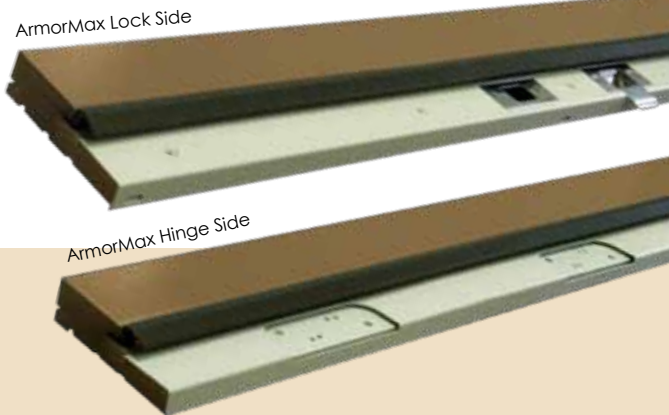

Available in both smooth and wood grain texture.

ARMORMAX JAMB™ - Optional

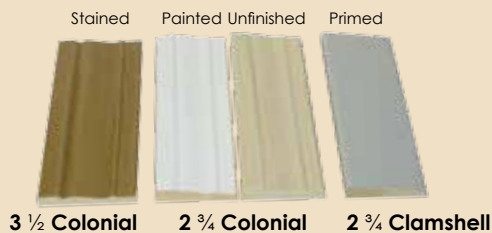

Patented

Replacement entry doors emerged during the 1970's. The steel "L" frame shored up the jamb giving it the security that homeowners desired. The ArmorMax Jamb™ System replicates that security in a pre-hung door by having an 18 gauge steel "L" frame embedded in the jamb on the lock side. And if needed hinge side.

INTERIOR CASING

Interior casing can be painted or stained; or come unfinished for customer to finish.

Anti-Pry Ball Bearing Hinges
Available in Black, Aged Bronze, Satin Nickel, Polished and Antique Brass.

REGENCY FIBERGLASS COLLECTION

Regency doors manufactured by HMI set the standard for beauty, quality and performance at excellent value. Explore the innovation and craftsmanship of door design for long lasting efficiency and durability.

- A** Composite top and bottom rail to help prevent moisture wicking from bottom of door.
- B** 20" lock block to enhance the durability.
- C** 2 1/4" engineered lumber stiles on lock and hinge side for rigidity and stability.
- D** Injected with polyurethane foam to offer 4 times the insulating value of wood.
- E** The durability of fiberglass to provide years of hassle-free, low maintenance - which unlike wood, does not warp or rot.
- F** Unlike steel doors which pose the risk of dents and/or rust, fiberglass skins provide more resiliency to stand up to normal wear and tear.

Mahogany Grain

Fir Grain

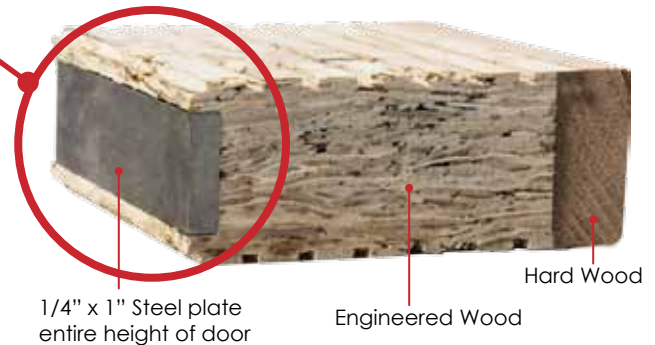

ASPEN FIBERGLASS COLLECTION

Aspen doors manufactured by HMI set the standard for beauty, quality and performance at excellent value. Explore the innovation and craftsmanship of door design for long lasting efficiency and durability.

- A** Composite top and bottom rail to help block the moisture that can wick the door.
- B** 4" lock stile with **C** 1"x1/4" steel reinforcement the entire height of door enhance the durability.
- D** 2 1/4" engineered lumber stiles on hinge side for rigidity and stability.
- E** Built with polyurethane foam core that offers 4 times of insulating R-value of wood HMI fiberglass doors insulate against heat and cold for energy efficiency.
- F** Fiberglass durability with little maintenance. The fiberglass door will bring years of durability. Unlike wood doors, fiberglass will not warp or rot and unlike steel doors will not dent or rust.
- G** Armormax lock side door frame included in Aspen door package for additional protection against intruders, and hinge side frame optional.

ASPEN - LOCK SIDE STILE™ Patented

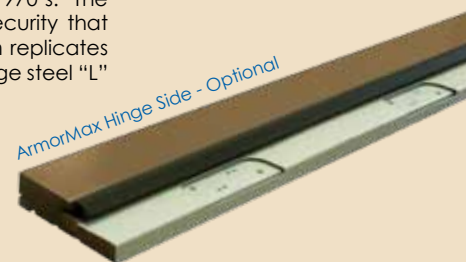

ARMORMAX JAMB™

Replacement entry doors emerged during the 1970's. The steel "L" frame shored up the jamb giving it the security that homeowners desired. The ArmorMax Jamb™ System replicates that security in a pre-hung door by having an 18 gauge steel "L" frame embedded in the jamb on the lock side.

Single Door Operates With Single Screen

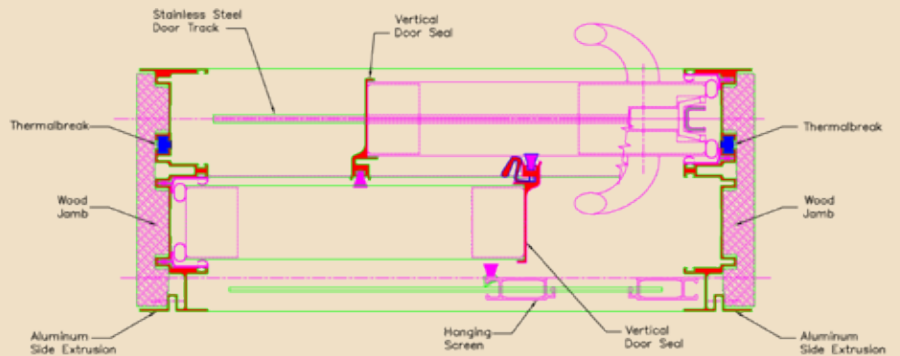

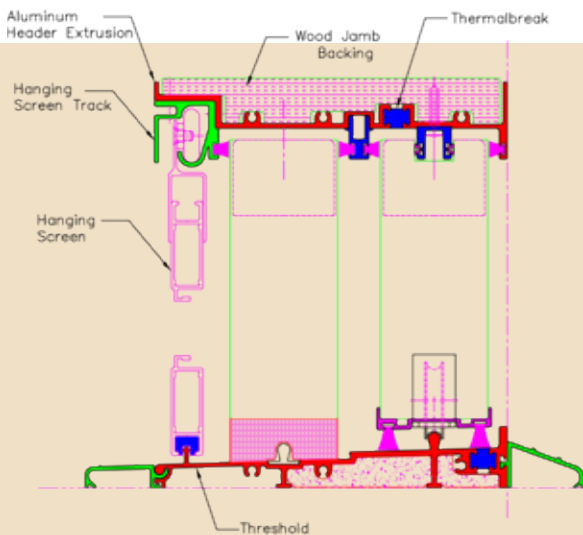

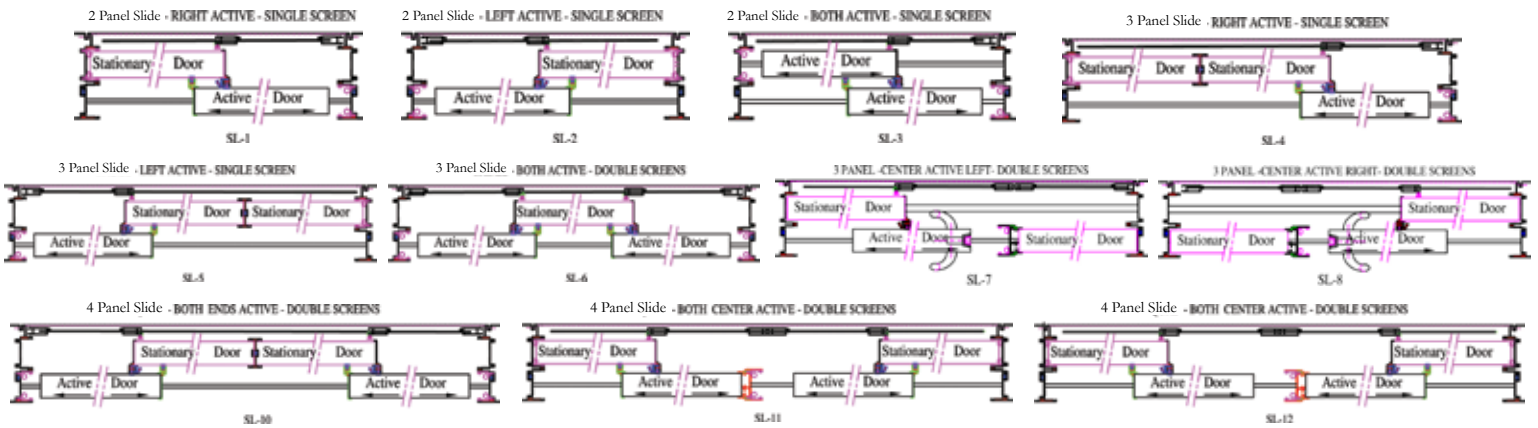

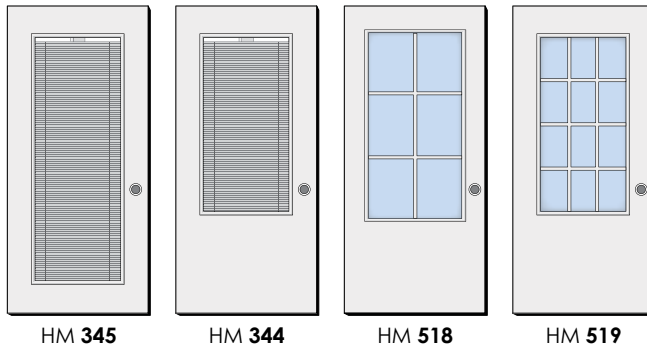

Both Doors Operate With Dual Screen

The ergonomically placed single* operator lets you tilt, raise and lower your blinds the entire length of the doorglass with only the slightest movement. No reaching or stooping is needed to adjust the blinds.

* Due to the size and weight of the blinds, the 80" sizes have a dual operator that controls the raise, lower and tilt function.

INTERNAL MINI BLINDS

Thermally sealed between two pieces of tempered glass, Internal Blinds (raise, lower and tilt) combine the privacy and light control of conventional blinds, with a hassle-free internal design requiring no dusting at all.

Note: There is a 1/4" gap between the edge of the blind - left, right and bottom - and the glass trim. This ensures proper operation when raising and lowering the blinds.

CUSTOM DOOR CONFIGURATIONS

Patio Door (with Single or No Screen)

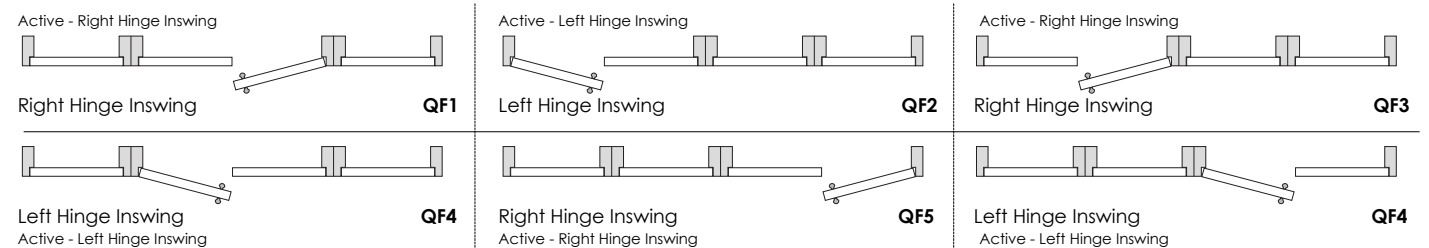

Double Door and One Stationary Door or Sidelite Unit (with Double or No Screen)

Triple Patio Unit (with Single or No Screen)

Double Door and Two Stationary Doors or Sidelites Unit (with Double or No Screen)

HANGING SLIDING SCREEN

For New Construction Only, Not Replacement

Exclusively manufactured by HMI, our Sliding Screen Door features a unique aluminum extruded design ensuring highest quality construction and durability. Unlike other sliding screens where all the weight is placed upon a floor mounted track, HMI's design uses a dual-wheel hung design allowing for a smooth and stress-free operation. (White is STD. Color is optional)

Single Sliding Screen configuration used for patio doors and Dual Sliding Screen configuration used for double doors. (Illustrated to the right)

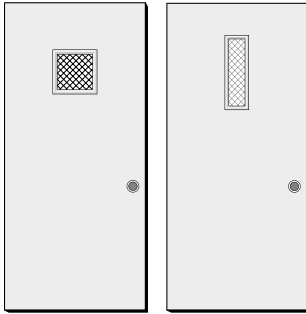

Screen Location

Inswing Patio and Double Door, screens are on the outside of the house. Outswing Patio and Double Doors, screens are on the inside of the house.

HME 252-BR

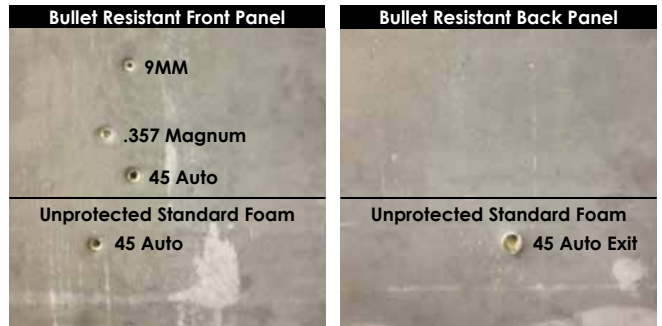

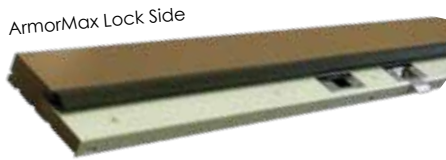

HME 260-BR

A Level 3 bullet resistant door panel does not have to look like battle armor. Our bullet resistant door panels are available in steel or fiberglass and can be painted or stained. No one but you will know that the door is bullet resistant.

These door panels are rated: NIJ-STD-0108.01 Level IIIA Bullet Resistant; and ANSI/UL-752 Level 3 Bullet Resistant. This combined with our 3 point mortise lock and hinge side ArmorMax™ jamb make our bullet resistant door panels the most secure residential doors on the market.

Sold only with 3-Point Lock System. See pg. 70 for additional details and handle selections.

FRENCH SIDELITES AND QUICKSHIP

French Sidelites work just like our Double Doors, another innovative option by HMI.

Hinged on opposite sides of the jamb, French Sidelites allow for the sidelite and door to be opened simultaneously, providing a wider opening.

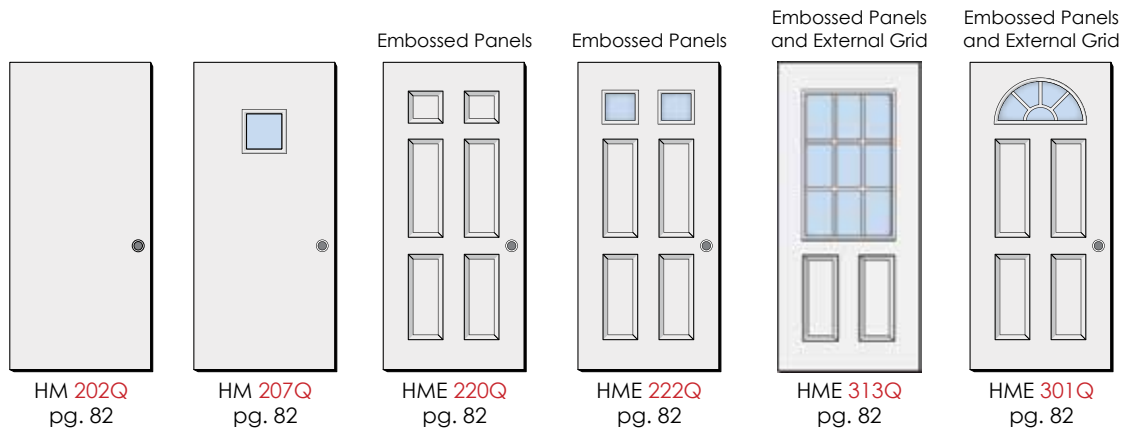

Enjoy the beauty of a classic door and sidelite with the practical space to move household appliances and furniture through.

◀ HM 242N Door and HS 242N Sidelite ▶

HMI QUICK SHIP DOORS

Available in 5 business days or less – Quick ship doors are constructed of smooth 20 gauge steel; painted white; can be either inswing or outswing; are available with a steel replacement frame or 4 9/16" new construction jamb; have clear glass; and polished hinges standard (other hardware finishes are optional). Available sizes are listed below each style Quick Ship door.

3-POINT LOCK

The 3 point lock is the perfect answer for security & bullet resistant doors. The top and bottom deadbolt locations are hidden from outside to prevent the intruder from breaking in.

- The top and bottom 3/4" backsets are passive until the deadbolt is engaged.
- The 1" deadbolt backset is engaged by turning the key on the outside or thumb turn on the inside. When the deadbolt is locked it automatically activates the projections in the top and bottom locks to become a 3 deadbolt locking system.

The lock with the click
Automatic latchbolts
projection from 10 to 20mm

- The stainless steel lock faceplate runs the full length of the door.
- The Allegro, Berkeley and Capri lever handle sets are available in single cylinder. See available finishes under each lock set.

PAINT, POWDERCOAT AND STAINS

Paint / Powdercoat

Stain Finishes

We can also paint your door a custom color with a color sample

Note: These sample colors do not accurately reflect actual painted/stained or powdercoated surface colors due to limitations in the printing process. Please see your sales representative for HMI color chips.

HMI steel entry doors are 20 gauge galvanized to A40 and chem treated to prevent rusting. **HMI** steel and fiberglass doors are first primed with a durable undercoat that is oven-cured for lasting resiliency.

Paint - A final paint finish is applied to the doors and oven-cured a second time forming an enduring lustrous look.

Stain - Hand applied to textured doors to give a wood grain appearance, it is then top coated with a 2-part clear urethane protective coat containing a UV inhibitor. Then it is oven-cured a second time forming an enduring lustrous look.

Powdercoat - Aluminum and security storm doors are chem washed then oven dried. The powdercoating is electrostatically applied and double baked to create a durable resilient finish. Powdercoats have a glossier sheen than do paints. For storm doors within 1 mile of shore line it is recommended to have: security doors zinc plated and aluminum storm doors chromated.

P - Matching Powder Coat finish to match Entry Door colors for Aluminum and Security Storm Doors

X - Paint Finish available on Textured Doors Only - Black

* Due to possible heat buildup, the warranty for entry doors does not apply to the door or glass trim painted in these colors when installed behind storm doors.
